

Dear all,

As you may remember, we previously sent an update regarding DAIDS Protocol Registration System (DPRS) training on June 30, 2010. In that email we informed users that a second phase of training was forthcoming. This second phase of DPRS training will be delivered in an eLearning format, utilizing the DAIDS Learning Management System (LMS), rather than Web-teleconference used previously. The eLearning format will allow for on-demand training available to be taken at your convenience.

The DAIDS LMS is Web-based software that offers sites the capability to assign, track, and monitor the completion of required training, thereby increasing the efficiency and effectiveness of training management, administration, and coordination across the NIAID (DAIDS) supported and/or sponsored Clinical Research Program. **An informational brochure can be found at [https://www.daidscrs.com/partners/Page DAIDS Learning Management System/DAIDS LMS Docs /DAIDS LMS Fact Sheet.pdf](https://www.daidscrs.com/partners/Page_D AIDS Learning Management System/DAIDS LMS Docs /DAIDS LMS Fact Sheet.pdf) and provides more information on the system and its capabilities.** The DAIDS LMS will be home to DPRS eLearning training as well as future Protocol Registration Policy and Manual eLearning training.

The first step in preparing to take DPRS training is to create a DAIDS LMS account if you do not have one already. You can create a DAIDS LMS account by taking the following steps:

1. Go to <http://www.daidscrs.com>.
2. From this site, click on Partners.
3. On the left navigation panel, click on DAIDS Learning Management System. This is your DAIDS LMS home page
4. Click on "Request New User Account(s)"
5. Enter in all required fields. **Please note that if your organization/site is not found in the drop down menu, select "Other" and provide your site name and number in the subsequent field.**
6. Someone from the DAIDS LMS Project team will then be in contact with you for the next steps in establishing site user accounts.

The DAIDS LMS also offers a web-based, on-demand training module that is available for you to view at your convenience. This module will walk you through the features of the DAIDS LMS, providing user simulations throughout. The module can be found on the DAIDS LMS home page and clicking on "DAIDS LMS Online Training".

The DPRS eLearning training is currently in a testing phase. A separate message for the official implementation and rollout will be sent on **October 4, 2010**, providing instructions on how to take the training.

For assistance in creating your DAIDS LMS account, please send an email to [DAIDSLMSSupport@ppdi.com](mailto:DAIDSLMSSupport@ppdi.com). If you have any questions about the DPRS please contact the DAIDS-ES support team at [DAIDS-ESSupport@niaid.nih.gov](mailto:DAIDS-ESSupport@niaid.nih.gov)

Thank you for your continued support.
