Infectious Diseases

Do You Know About HANC? HIV/AIDS Network Coordination

The **DAIDS RSC** is proud to work closely with other DAIDS Collaborators in support of the DAIDS mission. [The Office of HIV/AIDS Network Coordination \(HANC\)](#) is a valuable resource for DAIDS Clinical Trial Networks and Site Personnel.

What Does HANC Do?

HANC works with NIAID and the HIV/AIDS Clinical Trials Networks to:

- Facilitate collaboration and coordination on priority areas of research and operations
- Increase communication
- Streamline processes to improve research efficiency

What is HANC's Mission?

HANC's mission is to support the science and operations of the networks by increasing efficiency and resource-sharing through coordination of critical activities across networks and with other research and advocacy partners.

Efforts focus on:

- Scientific Leadership
- Behavioral Science
- The Legacy Project
- Site Management
- Communications
- Clinical Trial Logistics
- Harmonization of Data Management
- Laboratory Operations
- Training Development and Dissemination
- Development and Application of Consistent Standards of Performance Evaluation
- Facilitating Effective Community Engagement in the Research Process

HANC is based at the Fred Hutchinson Cancer Research Center in Seattle, Washington and has provided leadership and logistical support for cross-network coordination efforts since 2004. HANC is accountable in its activities to DAIDS and Network Leadership.
