Infectious Diseases

Division of AIDS (DAIDS) Table for Grading the Severity of Adult and Pediatric Adverse Events, Version 2.0, November 2014

Training Presentation Available

From March through September 2015, the DAIDS Safety and Pharmacovigilance Team in collaboration with the DAIDS RSC Safety Office conducted a webinar series for the new *Division of AIDS (DAIDS) Table for Grading the Severity of Adult and Pediatric Adverse Events, Version 2.0, November 2014*. Each webinar provided a brief description on the background and purpose of the Grading Table (GT) along with important overall changes, points to consider, and the implementation process. Case study discussions facilitated audience familiarization with the new GT.

More than 800 participants either participated in these webinars or attended live new GT training sessions held at one of the 2015 annual network meetings. The feedback we received and the interaction that was generated have been invaluable.

If you were not able to attend any of the webinars, live training sessions, or if you would like to view the new GT training again, it is now available on the DAIDS RSC Website. It can be accessed on the Safety and Pharmacovigilance Training page at: <http://rsc.tech-res.com/safetyandpharmacovigilance/safetytraining.aspx>

We strongly encourage personnel who will be using the *Division of AIDS (DAIDS) Table for Grading the Severity of Adult and Pediatric Adverse Events, Version 2.0, November 2014* to view this training.

If you have any questions or concerns, please contact the DAIDS RSC Safety Office at RSCSafetyOffice@tech-res.com.

Thank you,
DAIDS RSC Safety Office
